## TechHire Data-Driven Decision Making: Tools to Review and Manage Performance

Thursday, February 21, 2019

Moderator: [Ayreen Cadwallader](#)

Speaker(s): [Brian Smith, Ph.D.](#), [Timmy Dudley](#), [Christina Yancey, Ph.D.](#), [Joe Gaspar, Ph.D.](#), [Jenn Daley, Ph.D.](#), [Jeff M. Magada](#), [Gretchen Hammond](#), [Kathleen Gallant](#)

TechHire grantees will learn how performance data can influence program design, as part of a process improvement strategy to assess challenge areas, identify opportunities for improvement, and by making any necessary course-corrections to improve your grants!

Performance reports contains detailed information about TechHire grant activities, including leverage resources, strategic partnership activities, timelines, grant outcomes, promising approaches and success stories, and technical assistance needs. Grantees can use this information to track quarterly performance outcomes to help their organization sustain and grow workforce development strategies. During this webinar, you will have access to specific tools that you can use to analyze your data.

In addition to performance management data tools, this webinar includes a segment by the U.S. Department of Labor, Chief Evaluation Office focused on how your performance data, combined with other data, support evaluation. The evaluation segment will highlight the role of evaluation data in learning and continuous improvement, the relationship and importance of evaluation and performance together, as well as include an update on the evaluation of the impact of TechHire grants on participants.
